

Zomba Central Hospital  
Malawi  
Oct - Nov 2018

This is the story of Zomba Central Hospital.  
A tertiary facility for the Malawi Ministry of Health.  
This is the referral medical care centre for  
about 3.5 - 4 million people of Southern Malawi.

Zomba Central Hospital is a one story architecture, with multiple buildings. Families general camp outside with the wards being very crowded during rainy season.

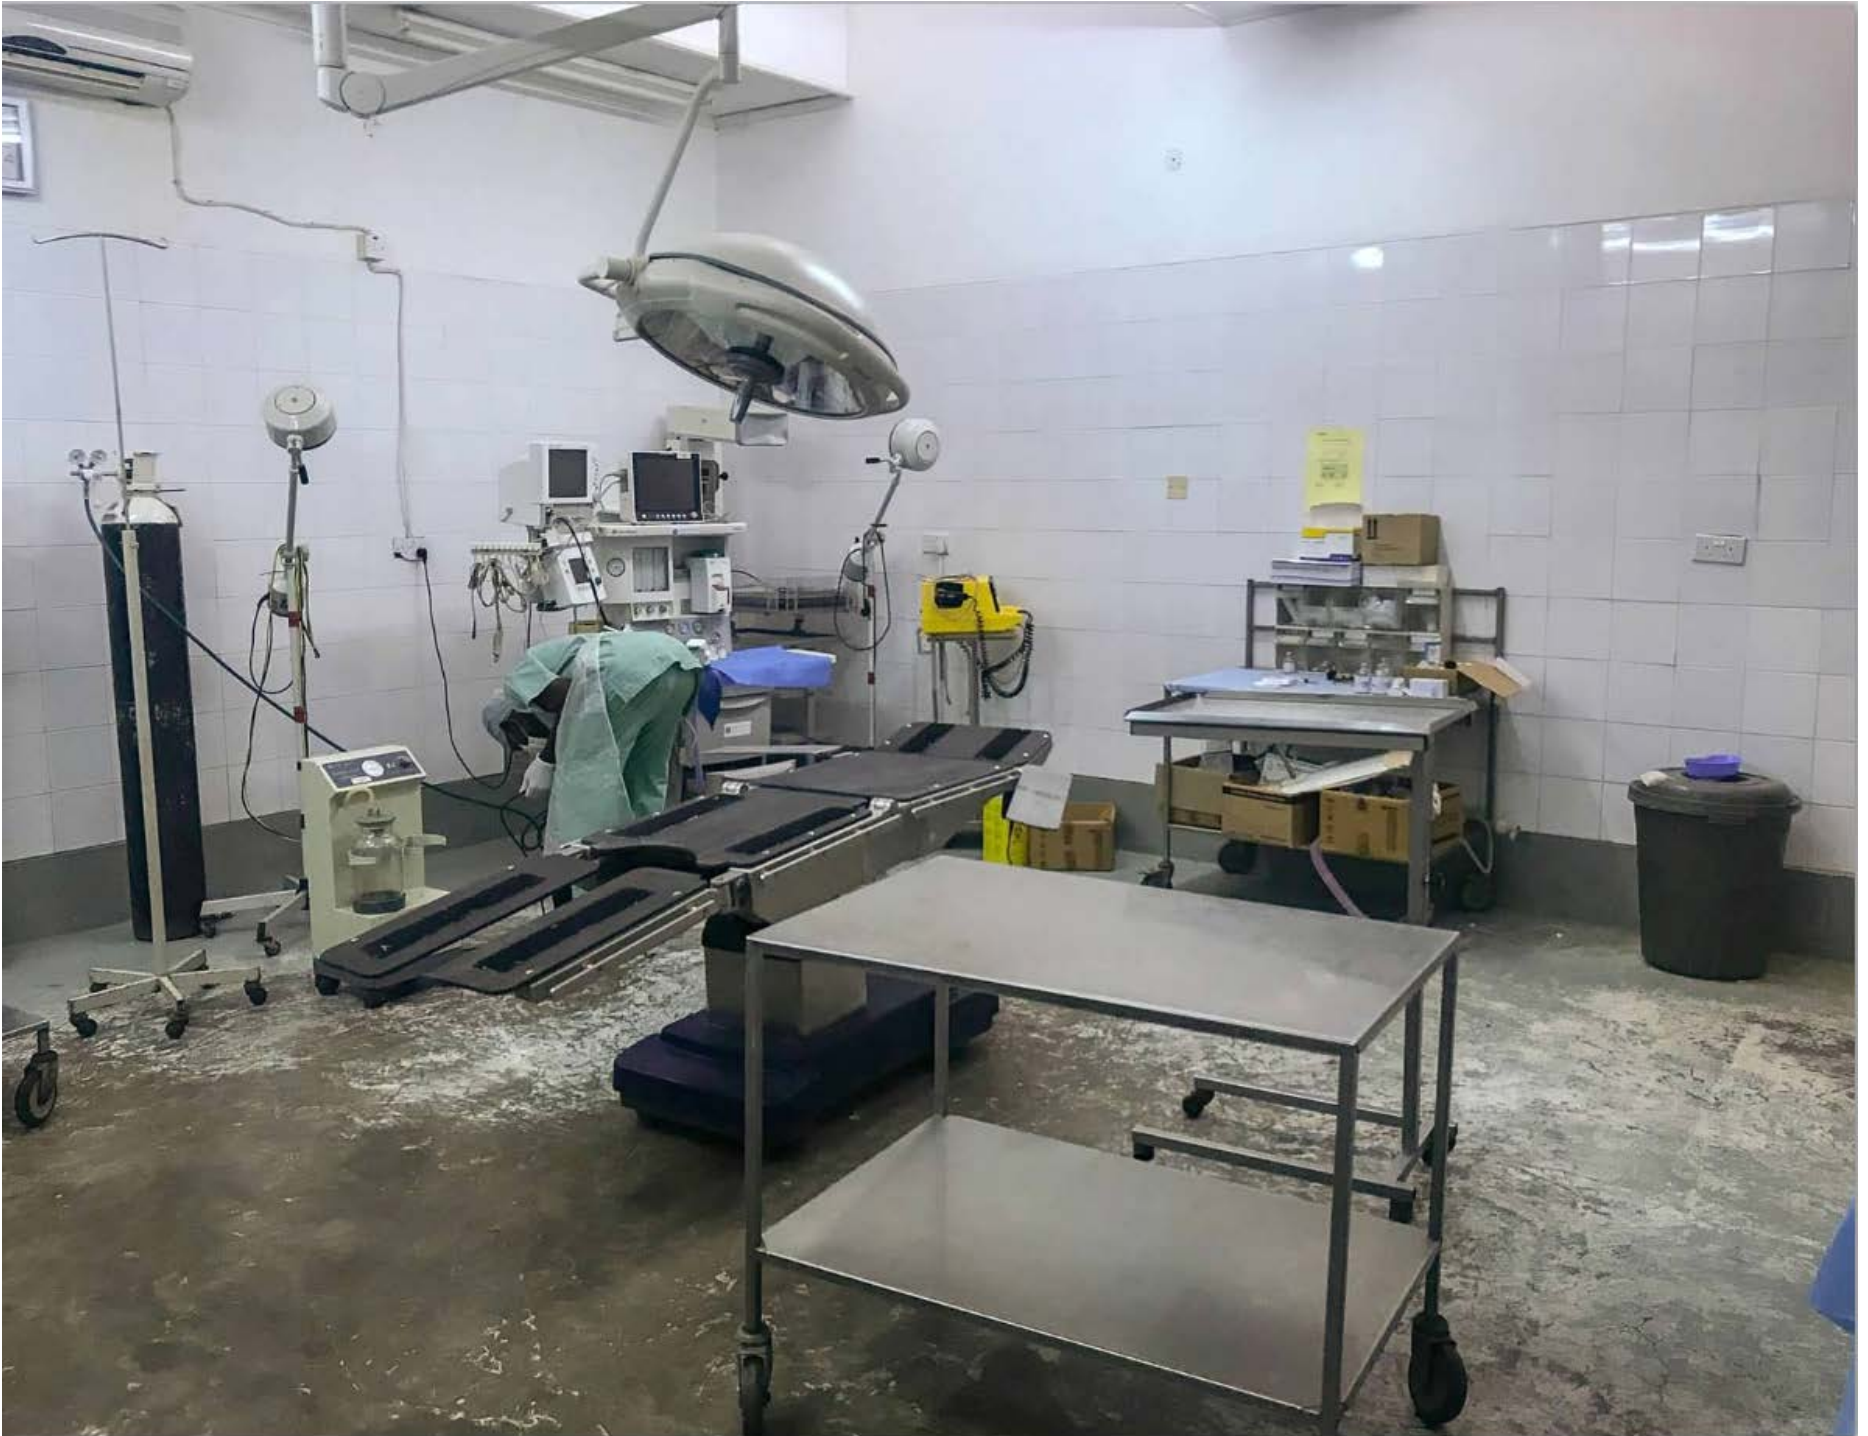

Zomba has some hilly areas as well as the main Zomba Plateau.

Zomba Central Hospital has 4 functioning Operating Rooms with an attached Recovery Room and Sterile Processing Department.

Supplies stored in  
Operating Room

**Staff is well trained in modern Sterile Surgical Technique and precautions.**

**Out Patient facilities are well used  
on a daily basis.**

**Sterile Processing  
Department sometimes  
staffed by Orthopaedic  
Clinical Staff**

Equipment is all well used and reused.
